Team panels (display only, from Torvik game logs): off/def rtg = points scored/allowed per 100 possessions, season to date, raw; Adj O / D = Torvik's opponent-adjusted ratings. Four factors pool every game: eFG%, TOV% = turnovers per possession, OREB% = share of own misses rebounded, FT rate = FTA/FGA; each offense sits beside the defense it meets tonight. In ratings, grey # = rank among D-I teams (1 = best); tonight's venue shaded. Four factors (all games, not opponent-adjusted) are z-scores: standard deviations better (+) or worse (–) than the D-I average for that unit, raw rate in grey (higher eFG%, OREB%, FT rate and lower TOV% are good for an offense; the reverse for a defense). Bold = the edge: tonight's-venue net rating (raw), and in each offense-vs-defense pair the higher z (none when within 0.25). Unit edge: Adj O's margin above the D-I average vs Adj D's margin below it, in points per 100 ('even' within 1 pt). Early-season numbers rest on few games, so treat them as noisy. Injury-list schools not matched to a Torvik team (not shown): Arizona, Boston University, North Carolina, UC Davis, Washington State.
